# DORCAS A. OLOO

Software Engineer

+254790921582

oloodorcas99@gmail.com

Makadara,, Nairobi, 100, Kenya

An adaptable and skilled Full-Stack Engineer with 4 years of experience designing and developing scalable web applications. I specialize in TypeScript, Next.js, SQL, and NoSQL databases, among other modern technologies. Known for my passion for learning and problem-solving, I am a fast learner and collaborative team player.

## WORK EXPERIENCES

### Frontend Developer
Instadriver | February 2024 - Present

- Directed frontend migration from React.js to Next.js, improving performance and loadingRedux/ReactQuery/Graphql(Apollo and Relay)
times by 50%.
- Collaborated on developing and optimizing interactive and responsive user interfaces using NextJS and Tailwind.

### Frontend Developer
Qawqal | August 2024 - December 2024

- Completed the development of the Qawqal admin website, focusing on UI implementation and optimizing usability.
- Worked on the user-facing application, leveraging Next.js, GraphQL, Apollo, and Tailwind CSS to create responsive and interactive interfaces.
- Developed an AI selection feature, enabling users to choose between OpenAI, Claude, and Google AI for a customized experience.

### Frontend Developer
EpicApp Ltd | May 2023 - December 2023

- Developed and optimized dynamic web applications using Angular, enhancing user engagement and performance.
- Collaborated closely with cross-functional teams to deliver high-quality, scalable front-end solutions.

### Frontend Developer
United States of Africa | November 2022 - May 2023

- Developed and optimized dynamic web applications using React JS, enhancing user engagement and performance.
- Collaborated closely with cross-functional teams to deliver high-quality, scalable frontend solutions.

### Internship
Gitstart | August 2022 - September 2022

- Contributed to Storybook as an open-source project, enhancing UI component documentation and reusability.
- Developed and refined client applications, focusing on responsive design and user experience.
- Leveraged React and Next.js to build efficient, scalable web applications for diverse client needs.

## PROJECTS

### Movershaven
https://movershaven.com/

A platform for finding professional and reliable movers. MoversHaven is a platform designed to connect customers with reliable, professional movers. By enabling users to easily find, compare, and book movers, the platform ensures transparency, trust, and convenience, effectively addressing key challenges customers face in the moving process.

## SKILLS

Javasript/Angular/React/NextJs/Python/Django

Redux/ReactQuery/Graphql(Apollo and Relay)

PostgresSQL/MySQL

Docker/Git/Figma

## EDUCATION

Bsc Computer Science Computer Science
Jomo Kenyata University of Agriculture and Technology(JKUAT)
September 2017 - December 2022
